# Club Med 2 Pillars and reasons to believe

## A sailing yacht, not a cruise ship

With a length of 187 meters, 2,700 square meters of teak decks, 184 cabins and an interior design combining sophistication and a commitment to yachting etiquette, Club Med 2, the world's largest sailing yacht, is first and foremost a human-sized ship offering a different way of traveling.

**Halfway between tourism and adventure**, it offers a journey. Contrary to one of its main competitors, the Compagnie du Ponant, Club Med 2 does not draw on the imagery of exploration or discovery— instead, it focuses **on the yachting and leisure sailing experience which originated in the Mediterranean region at the start of the last century.**

**Casual chic, elegance and simplicity** are its hallmarks.

## The quest for well-being

Aboard the sailing yacht, the traveler is invited on a search for wellness. It all begins with the rhythms of sailing, with noble materials, an authentic interior design and **a general sense of calmness emanating from the ship.**

The activities offered on board - yoga, special spas by Sothys, etc. - have been carefully selected to enhance this regenerative experience.

## A chic & Festive Spirit

In keeping with the French Riviera spirit of yachting's origins, Club Med 2 boasts a distinctive festive spirit on its decks. **Chic yet never formal. Fun yet always sophisticated.** Travelers are **free** to follow their own desires and choose between a **calm or festive setting at any time.**

## Bonding with the Ocean and all its wonders

The sailing yacht is nothing like a floating theme park or a gilded cage, it is above all else a unique way of sailing from one port of call to the next.

In a letter to Albert Camus, Maria Casarès once described cruising as a "**respite from the world**". Club Med 2 reflects this vision as a **contemplative experience** focusing on the discovery of the ocean.

The sports activities offered in the **Hall Nautique** (water sports center) have been carefully selected to strengthen this bond with the water element.

## An authentic way of Traveling the world

**Thanks to its shallow draft and modest world size, the Club Med 2 is able to drop anchor in waters which are not accessible to other cruise ships.**

**Utterly devoid of any sense of urgency, it provides a different way of reaching a port of call by cruising along with the winds and the waves.**

**As such, although sailing in well-known waters —the Caribbean and Mediterranean seas— it essentially offers a new perspective on the world.**

**An invitation to a journey.**
